Student Level Corrections (SLC) Workflow

User guide for completing the workflow in Stepwell

Demo: SLC demo video

This guide explains how to manage and complete the **Student Level Corrections (SLC) Workflow** within Stepwell, ensuring compliance and proper resolution of findings.

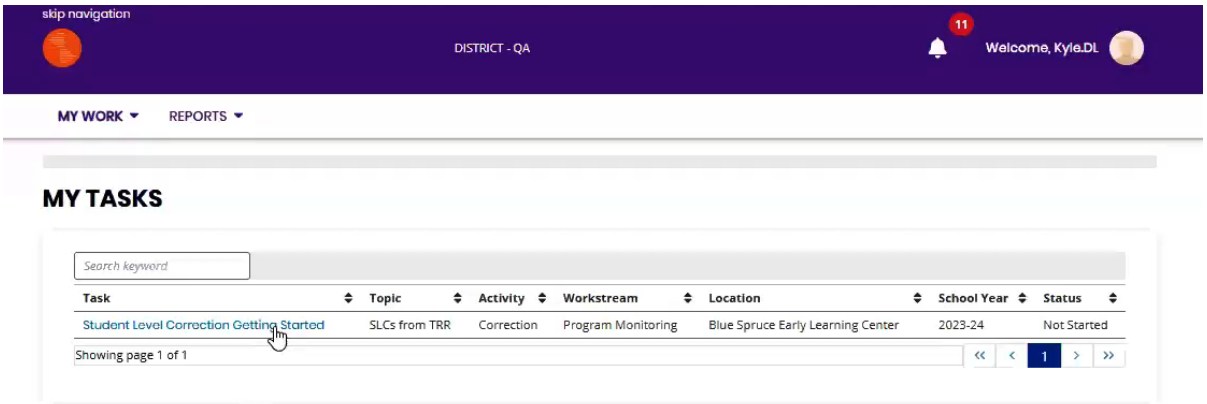
1. Overview

- The SLC Workflow begins after the **Topical Record Review** workflow when a location is found to be noncompliant.
- **Corrections** must be completed within 365 days to address findings and ensure proper care for affected students.
- This workflow involves collaboration between the **LEA** (Local Education Agency) user and the **SEA** (State Education Agency) user.

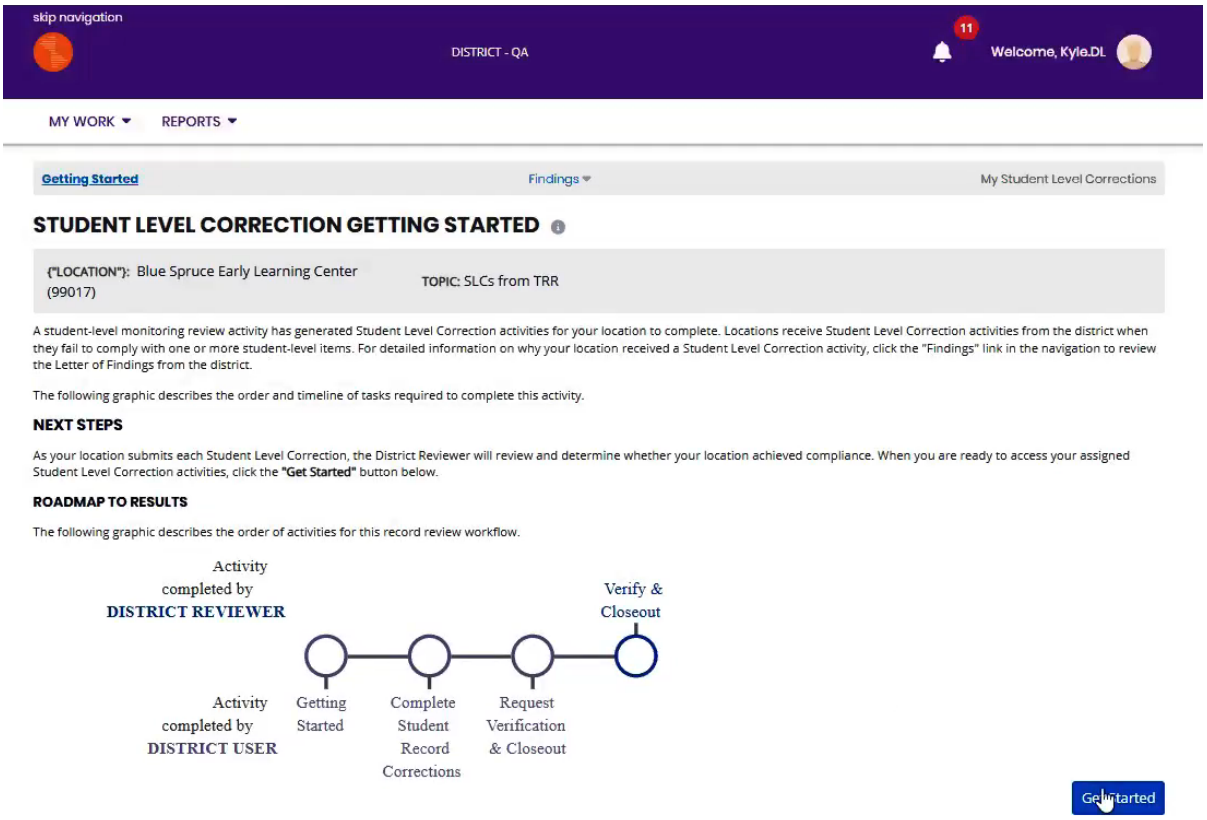
2. LEA workflow steps

Step 1: Access the workflow

1. Log in as an LEA user.
2. Navigate to the **Getting Started** page from your tasks.



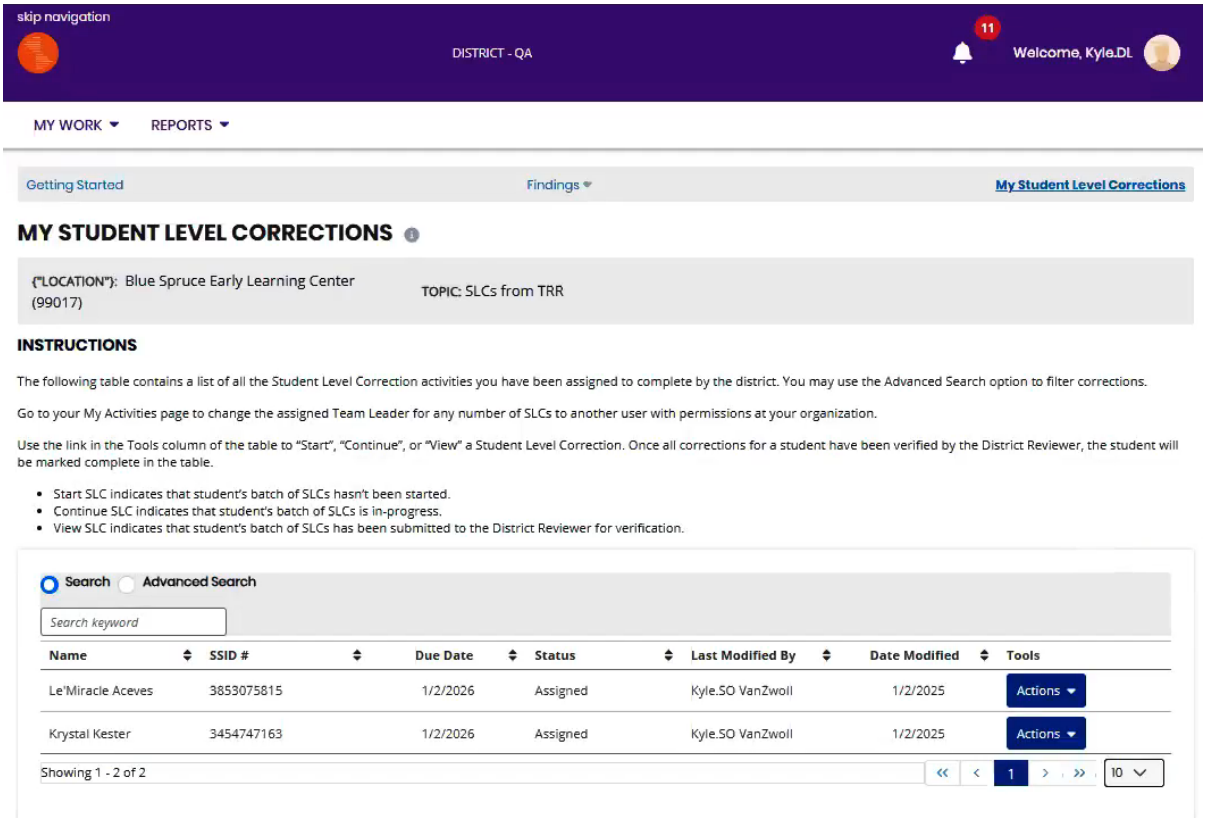
3. Review the roadmap and click **Get Started**.



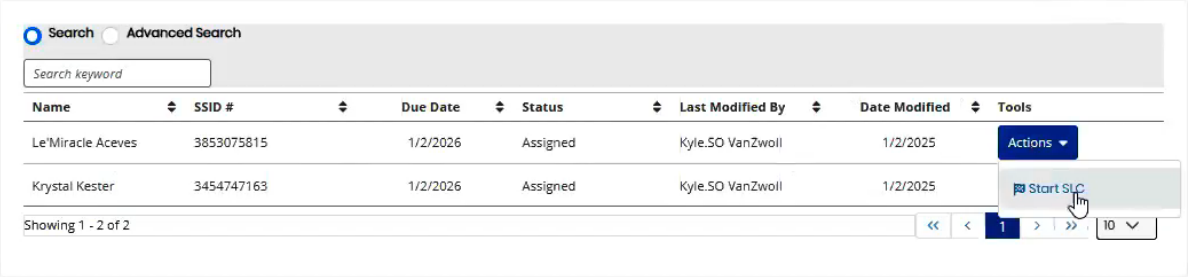
Step 2: Review noncompliant students

- Download the Findings Letter generated from the TRR activity by selecting **Topical Record Review** from the Findings dropdown in the navigation bar.

- The system displays a list of students and their findings from the Topical Record Review.



- Select a student and click **Start SLC** to review their specific noncompliant items.



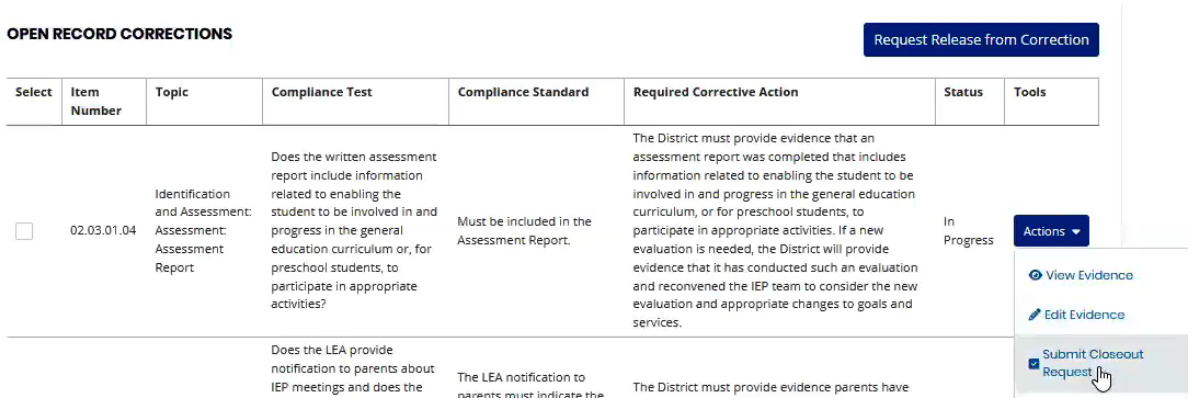
Step 3: Address noncompliance

1. Review the **Open Record Corrections** table, which lists:
    - Noncompliant items
    - Compliance standards
    - Required corrective actions
2. Add evidence of correction:

1. From the **Actions** dropdown, select **Add Evidence**.
2. Upload supporting documentation and save the evidence.
3. The status for that correction updates to **In Progress**.

Step 4: Submit for review

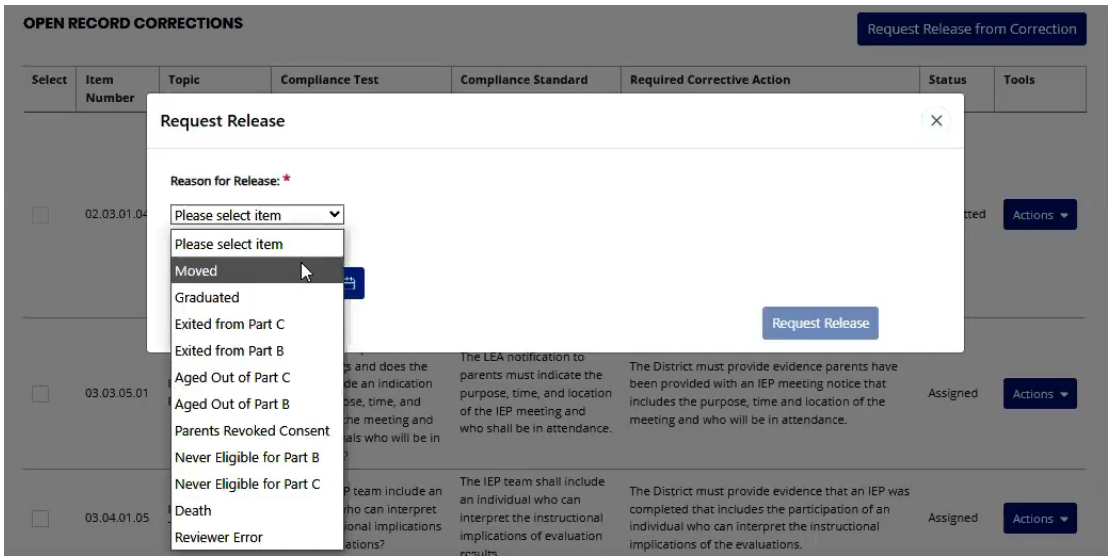
1. When one or more corrections have been addressed, click **Submit Closeout Request** in the Actions dropdown to send the correction(s) to the SEA for review.



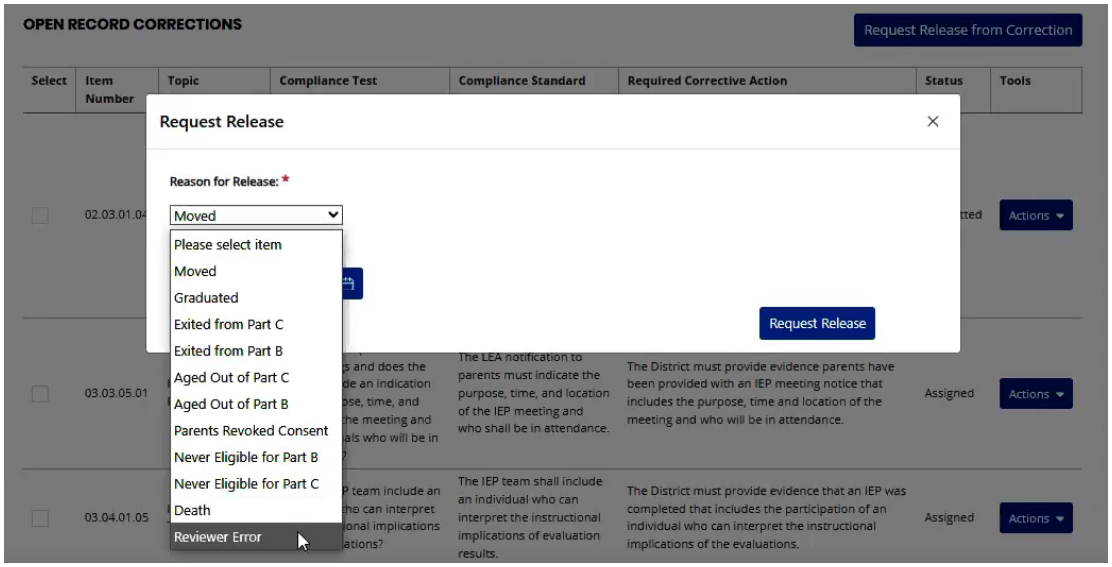
2. If one or more of the student's corrections cannot be addressed (e.g., due to the student moving, or an error made by the reviewer), then request a release:
   a. Use the **Request Release from Correction** option above the grid.

   b. Selecting any option from Moved through Death will result in a "Bulk Release", i.e., all the corrections in the grid for that student will be sent to

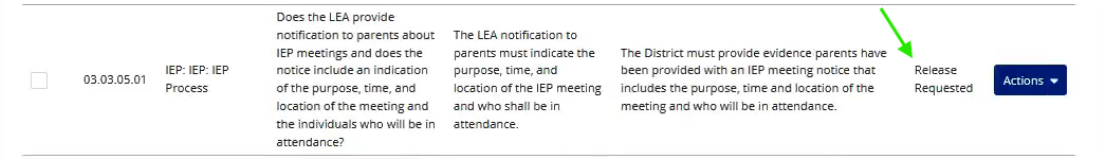
the SEA for release.



c. Selecting the “Reviewer Error” option will result in an individual release, i.e., only one correction from the grid for that student will be sent to the SEA for release.



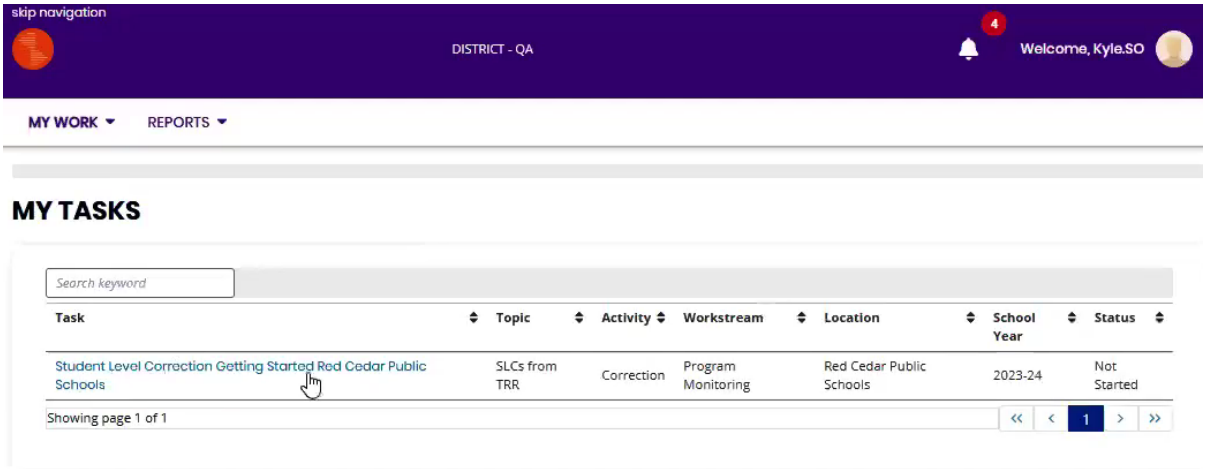
d. Upload supporting evidence for the selected reason and click Request Release. The status for the applicable corrections will be updated to “Release Requested”.



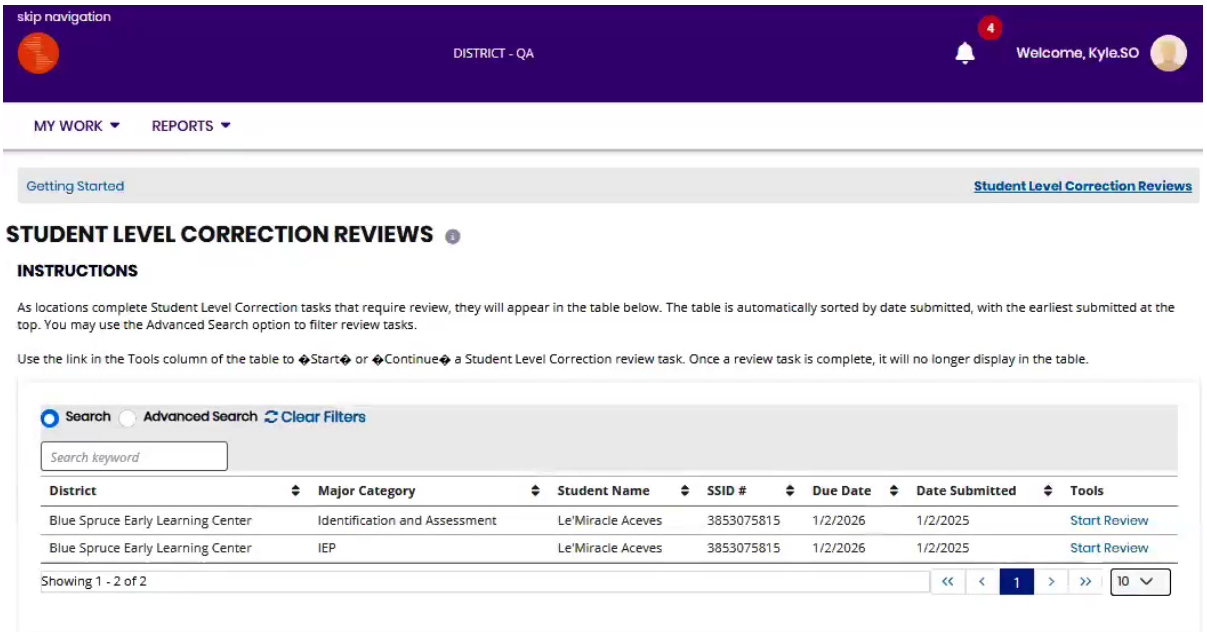
3. SEA workflow steps

Step 1: Access submitted corrections

1. Log in as an SEA user.
2. Navigate to your **Tasks** page and select the **SLC Getting Started** task.

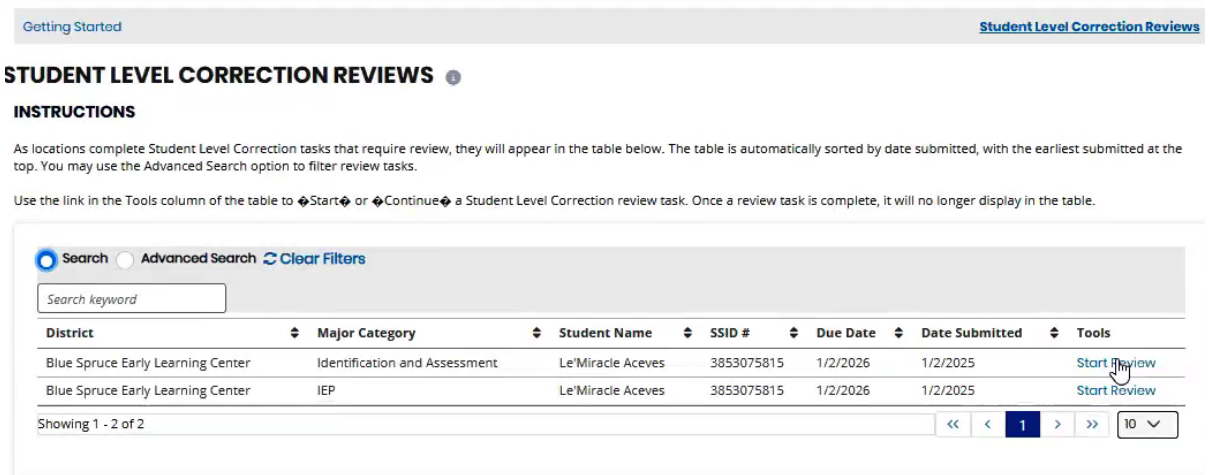


3. Review all submitted corrections from assigned locations.

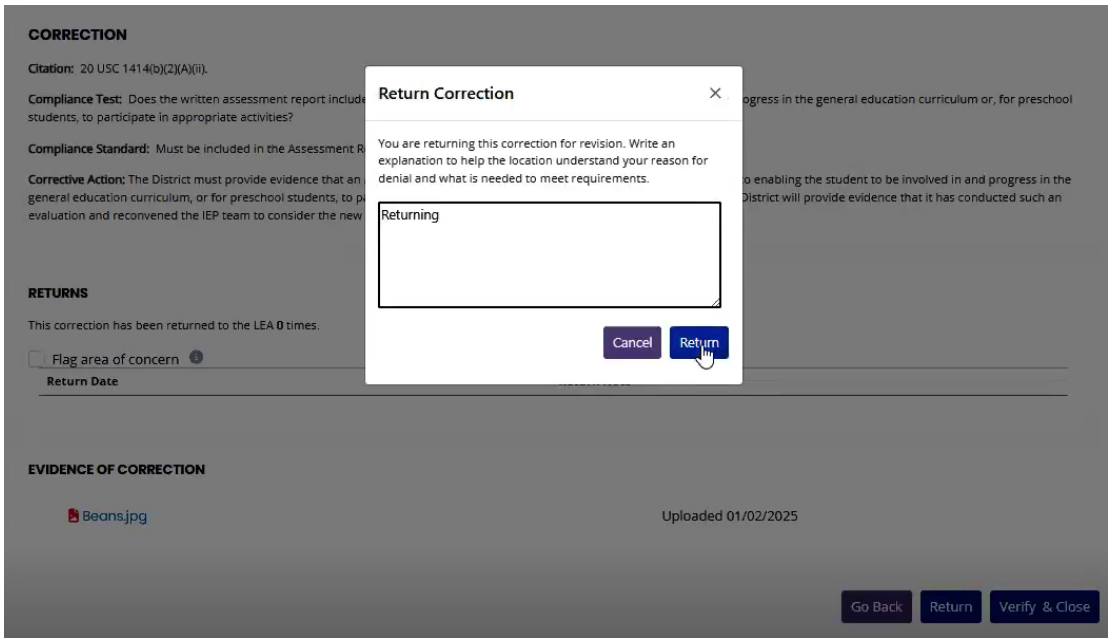


Step 2: Review individual corrections

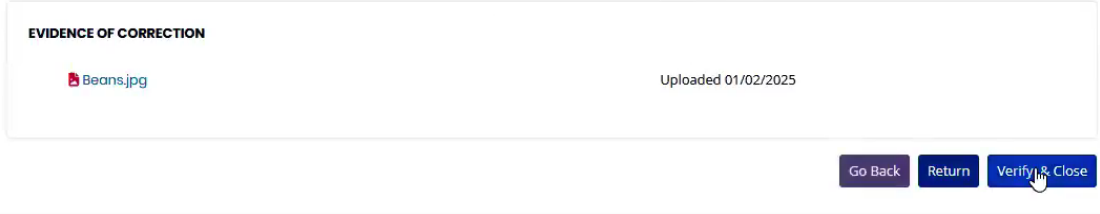
1. Select a correction and click **Start Review**.



2. Examine the evidence provided and compliance details.
3. Decide on the correction:
   a. **Return**: Send the correction back to the LEA with feedback if evidence is insufficient.

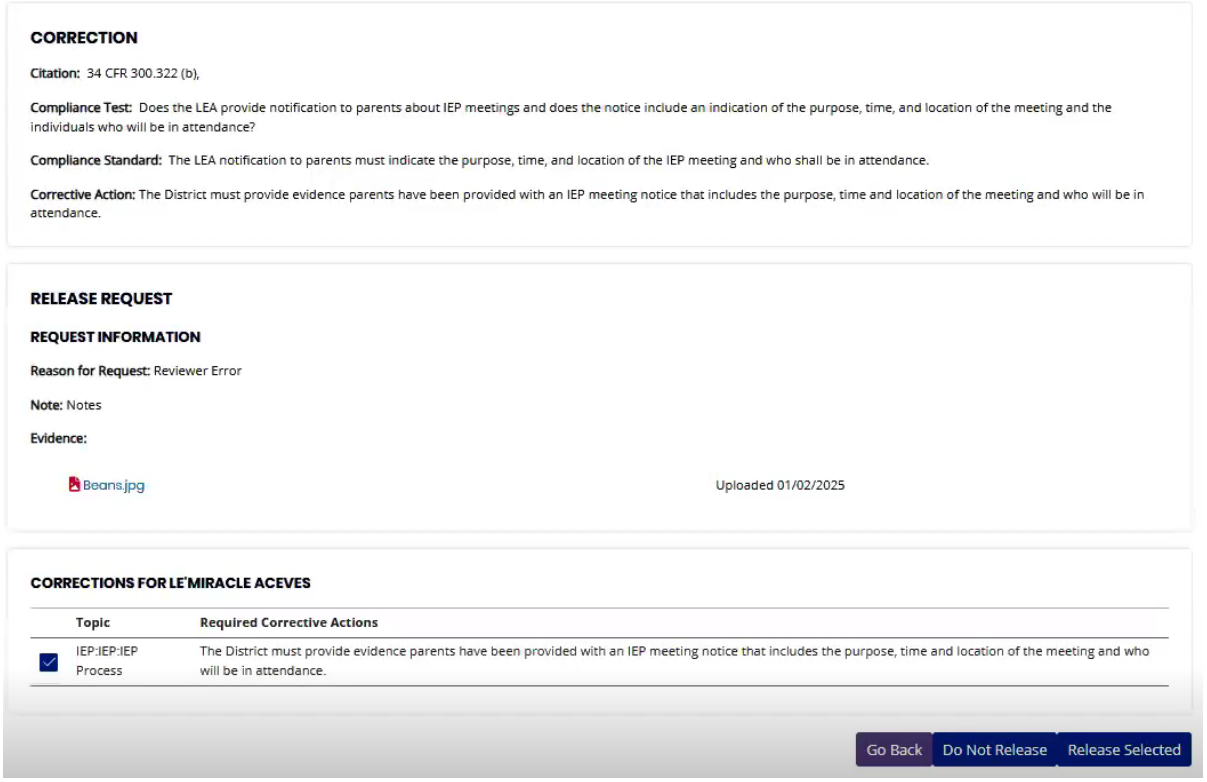


b. **Verify and Close**: Approve the correction if it meets standards.



Step 3: Review release requests

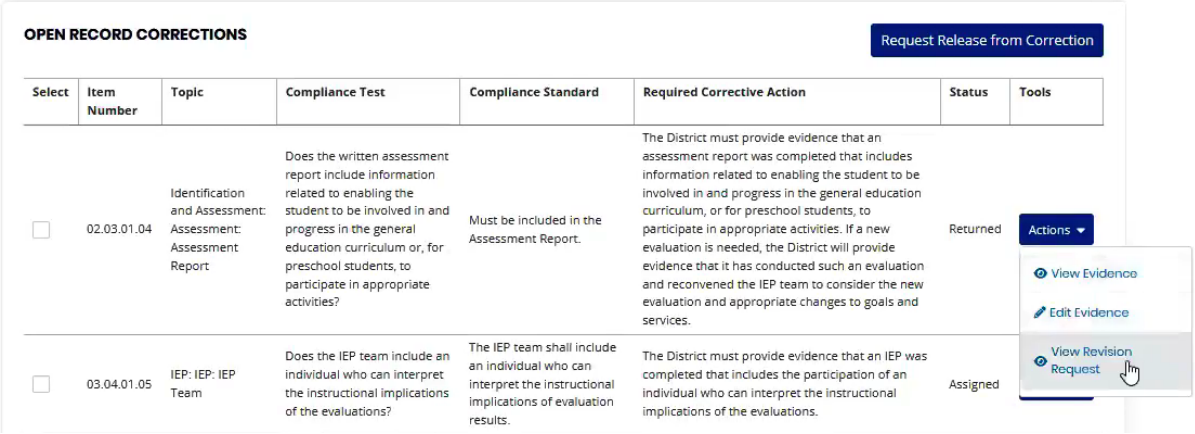
- For corrections flagged for release, review the justification and evidence.
- Approve or deny the release based on the validity of the request.



4. Managing returned corrections

LEA actions

1. Log in as the LEA and navigate to the My SLCs page to return to the Open Record Corrections grid. Review the returned items to see feedback from the SEA.



OPEN RECORD CORRECTIONS

Request Release from Correction

Select	Item Number	Topic	Compliance Test	Compliance Standard	Required Corrective Action	Status	Tools
☐	02.03.01.04	Identification and Assessment: Assessment: Assessment Report	Does the written assessment report include information related to enabling the student to be involved in and progress in the general education curriculum or, for preschool students, to participate in appropriate activities?	Must be included in the Assessment Report.	The District must provide evidence that an assessment report was completed that includes information related to enabling the student to be involved in and progress in the general education curriculum, or for preschool students, to participate in appropriate activities. If a new evaluation is needed, the District will provide evidence that it has conducted such an evaluation and reconvened the IEP team to consider the new evaluation and appropriate changes to goals and services.	Returned	Actions
☐	03.04.01.05	IEP: IEP: IEP Team	Does the IEP team include an individual who can interpret the instructional implications of the evaluations?	The IEP team shall include an individual who can interpret the instructional implications of evaluation results.	The District must provide evidence that an IEP was completed that includes the participation of an individual who can interpret the instructional implications of the evaluations.	Assigned	

2. Address the issues by:
   a. Adding new evidence via **Edit Evidence**.
   b. Resubmitting the correction via **Submit Closeout Request**, as before.

3. View corrections approved by the SEA:

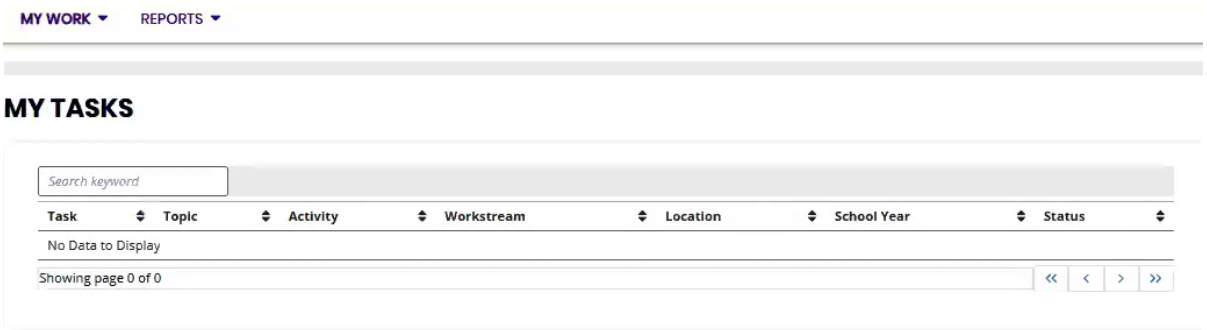
   - **Released** corrections move to the **Released Corrections** grid.
   - **Verified and Closed** corrections move to the **Verified and Closed** grid.

SEA actions

1. Reassess the resubmitted corrections.
2. Approve or return as necessary, ensuring all corrections are resolved.

5. Completing the workflow

- Once all corrections are addressed, the workflow is complete, and no further tasks remain.



6. Best practices

- **For LEA Users**:
  - Ensure all required evidence is clear and complete before submission.
  - Regularly check the task list for returned corrections.
- **For SEA Users**:
  - Provide detailed feedback when returning corrections.
  - Verify all evidence thoroughly to maintain compliance.
